

# **DXT** Mouse 2 Wired

LIGHT CLICK VERSION  
ERGONOMIC VERTICAL MOUSE  
COMFORT WITH ACCURACY

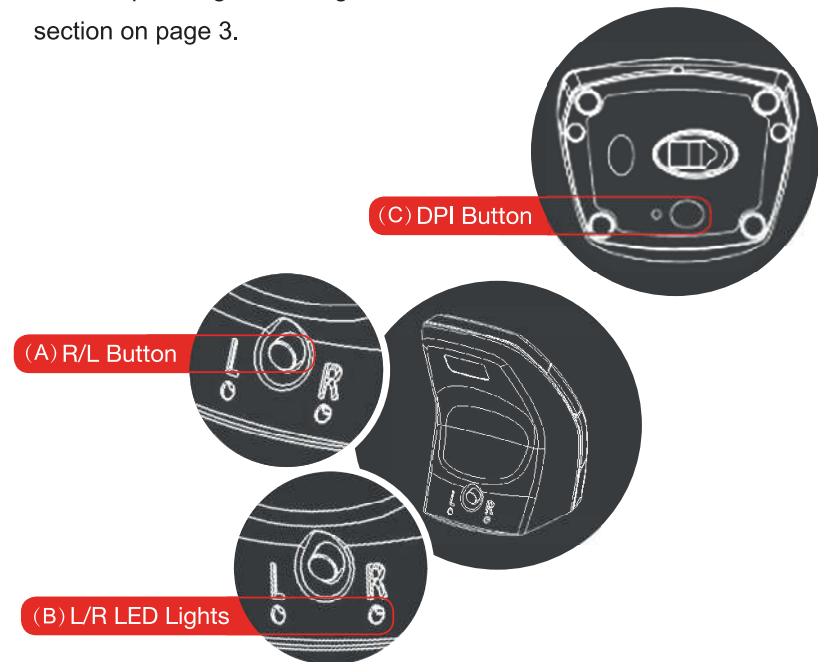

## Getting Started

Congratulations on your purchase of the **DXT MOUSE**.

You have just taken your first step towards comfortable and productive computing.

### Wired version

The DXT Mouse is Plug and Play. No additional software is required. Plug the USB cable into empty USB computer port. For more features please go to "Using the DXT Mouse" section on page 3.

## Holding the DXT Mouse

### How to hold the DXT mouse

When holding the mouse, place your thumb in the centre of the curved ridge on the back of it (Figures 1 and 3).

Allow your fingers to curl naturally around the front of the mouse to take up one of the positions shown in (Figures 2 and 4).

Press the button (A) beneath the thumb surface to select either left or right hand use – a red light will illuminate under L (Figure 1) for left hand use or R for right hand use (Figure 3).

2. Left hand front view

3. Mouse set for right hand use

4. Right hand front view

## Using the DXT Mouse

### How to change from right to left hand use

The DXT Mouse is set to right-handed by default.

You can switch hands by simply pressing the R/L button (A).

Press this button once. The LEDs (B) will flash once to indicate which setting you have selected.

### How to change the speed of the DXT mouse cursor (DPI)

The default setting is 1000 DPI. To adjust your DPI press button (C).  
1 flash = 500 DPI, 2 flash = 1000 DPI, 3 flash = 1500 DPI, 4 flash = 2000 DPI.

You can adjust the DXT Mouse buttons, cursor speed and design in the control panel within your computer.
